What and where in EasyCow

- Overview – Get the daily overview of the animals
- Find Animal – Find the specific animals and information about these
- Lists – Find list of animals with different purpose

Overview

- Do registration – the most common registration
- Key performance indicator – how much milk delevered
- Today's Treaments – animals and medication
- Reproduction lists:
 - Calving
 - Open
 - Inseminated
- Withdrawal time
- Edit your layout

How to use the Lists

- Touch the row to see more info
- Select one or more animals and do Registration or look up the Cow card

The screenshot shows the 'Calvings' mobile application interface. At the top, there's a header with a back arrow, the title 'Calvings', and icons for notifications (with a red '1'), a warning, and settings. Below the header, there are two tabs: 'Expected' (selected) and 'Previous'. The main content area displays a table of animals under the 'Expected' tab. Two rows are highlighted with orange boxes, indicating they are selected. Below the table, there are fields for 'Date', 'Lact. no.', 'Lactation status', and 'Transponder No.'. At the bottom, there are two buttons: 'Registration (2)' and 'Go to Cow card (2)', both highlighted with orange boxes. The bottom navigation bar contains three icons: 'Overview', 'Find animal', and 'Lists'.

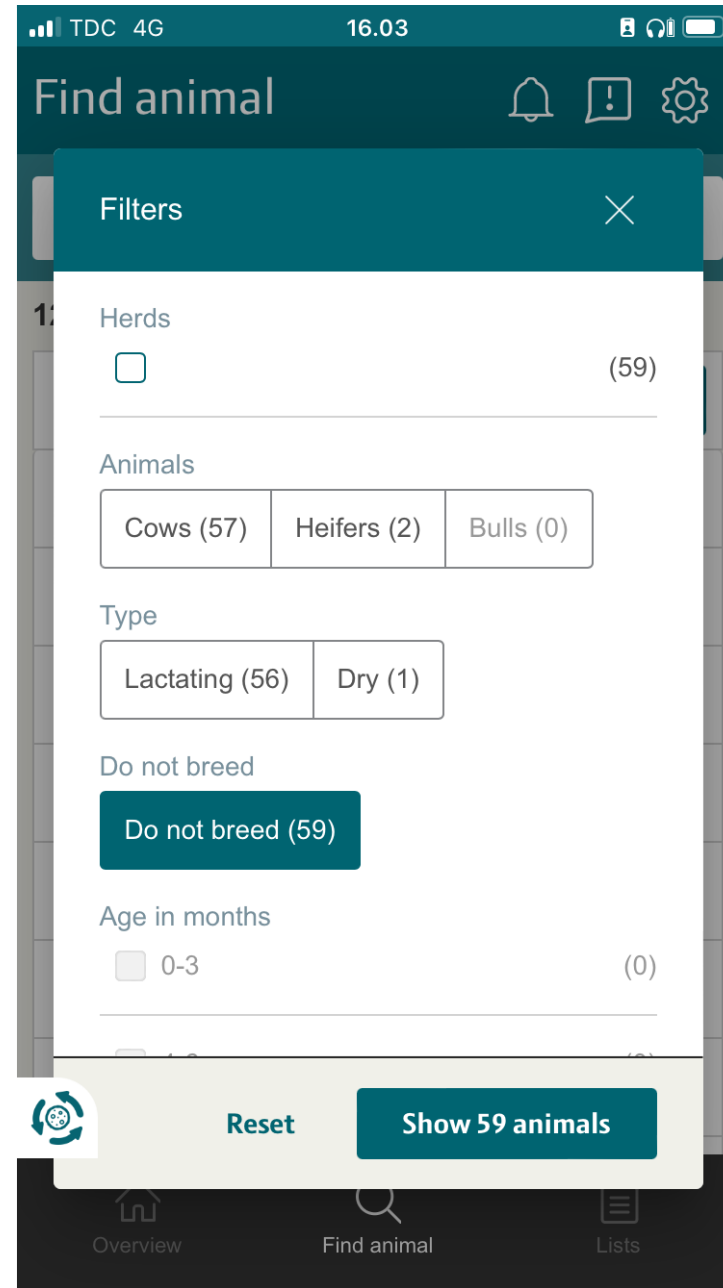

Animal no.	DBC	Status
-04924	3	Cow
-05407	3	Cow

Date: 02-16-2024
Lact. no.: 2
Lactation status: Lactating
Transponder No.: 10047834

Registration (2) Go to Cow card (2)

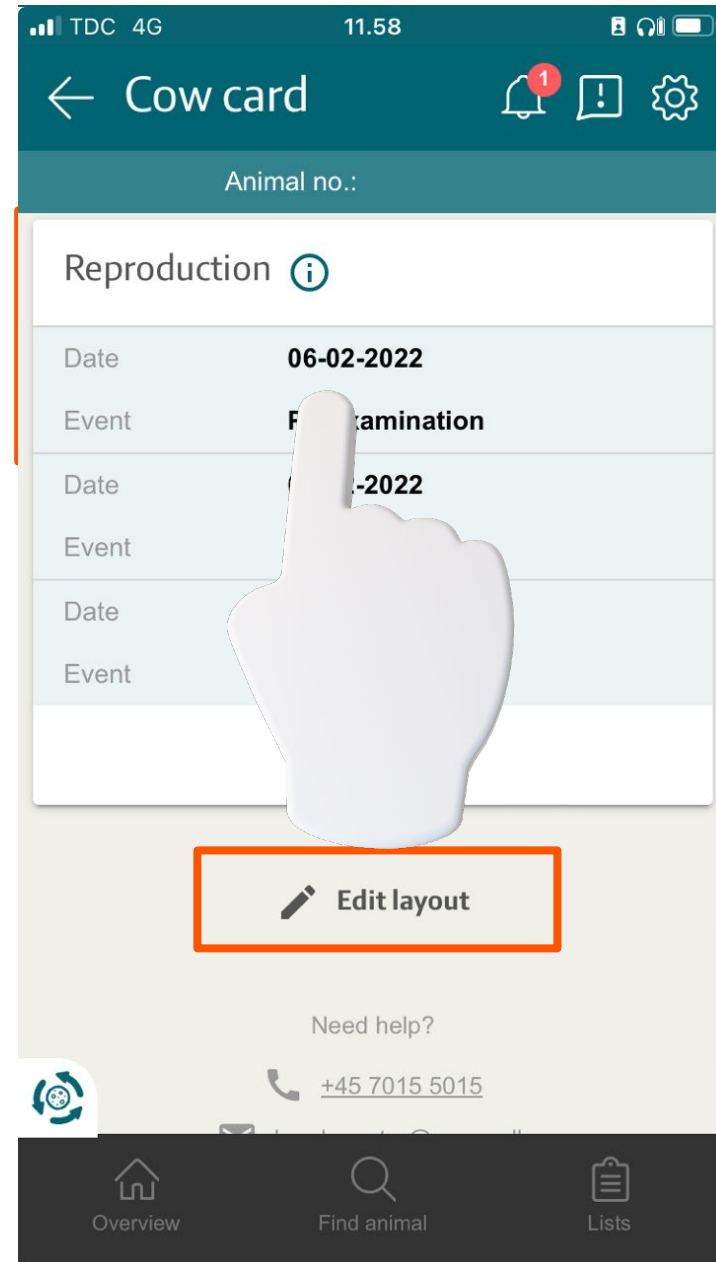

Find animal

- Mark one or more animals and do Registration or look up the Cow card
- Search for animal
- Filter for group of animals

CowCard

- Focused information
 - Withdrawal time
 - Do not breed
 - Pregnant or open
 - Other repro-information
- Registrations
- Milkttest result
- Group change and Do not breed
- Select more animals and swipe between them
- Edit your cowcard

Thank you
